

## **WEEKLY REPORT - 1**

### **Work done in last week ( Attach supporting Documents):**

1. **Introduction:** Covered the fundamental concepts of cybersecurity, specifically focusing on the "Why, Where, and How" it is implemented.
2. **Cybersecurity Domains:** Explored various domains in the field, including Offensive Security, Defensive Security, Digital Forensics (DF), and Governance, Risk, and Compliance (GRC). Also discussed the related job options and sub-branches for these domains.
3. **Operating Systems Information:** Learned about the primary operating systems used in the industry, with a focus on Windows, Kali Linux, and Parrot OS.
4. **Attacks and Linux Basics:** Studied different types of common cyber attacks and practiced basic common commands on the Linux terminal.
5. **Knowledge Gathering:** Conducted research and gathered information regarding how malware works and the mechanics of basic attacks.

### **Reason for incomplete work:**

1. NA

### **Plans for next week:**

1. **Malware Practical (System Hacking)**
2. **Phishing Practical**

### 3. Introduction to Networking
